

ADMISSIONS OPEN 2026-2027

B.Sc. Data Science

3 Years - Degree Program

**Eligibility :
12th Pass (Any Stream)**

What is Data Science?

Data Science is the process of turning raw information into useful insights. It combines skills from maths, computer science, and statistics. Data scientists collect a lot of data, clean and sort it, find patterns or trends, and present it in a clear way to help people or businesses make better decisions.

Why Learn Data Science?

In today's digital age, data is all around us. Companies need big data storage warehouses and skilled people who can make sense of that data and help them grow. This course teaches you how to understand, study, and show data in a way that solves real-world problems and supports smart decision-making.
